RSMS ARCHITECTS

SHAPING THE FUTURE OF HEALTHCARE

According to research, the global healthcare architecture market is growing profoundly and is forecasted to increase to a whopping \$8,210.5 million by 2025, registering a CAGR of 4.1 percent during 2018-2025. RSMS Architects is one of the leading Healthcare Design Firm having a dedicated studio working solely on Healthcare Projects. "How hospitals appeared a couple of decades ago, to the present day, it has been quite metamorphic. With the industry shifting to a value-based service model, where outcomes and satisfaction drive reimbursements, the patient experience is taking on a whole new level of importance for providers who are looking to add value by designing more patient- and family-friendly spaces which are simultaneously cost-sensitive. Hospitals today and going forward in the future will not only be places to provide care for patients but will also have to provide socially engaging places for attendants", says Ar. Manu Malhotra, Founding Partner & Director, RSMS Architects.

COVER FEATURE

Bespoke Service Provider

Established in 2006, the brainchild of Ar. Rohit Jain, Ar. Manu Malhotra, Ar. H.S. Sandhu, and Ar. A.S. Sandhu is a firm with the expertise of over 60+ Healthcare projects done, 15 million sqft area built. The Delhi-based firm has a cohesive understanding of the healthcare industry and technological advancements. It has been providing characteristic, innovative, aesthetic, and safe healthcare design solutions for 16+ years. RSMS Architects' unmatched expertise revolves around offering a service portfolio, including comprehensive architectural services, space programs, interior design, façade design/3D visualization, structural design services, MEPF design services, modular OT, PTS, landscape design, MGPS services, and business strategy. Its medical area program is governed by user experience, operations, inter/intra departmental relationships, patient-staff movements, security, and accessibility. Also, a part of it is an evidence-based design where each design solution is tailored according to the client's requirements and the challenge. Today, RSMS Architects' headquarters spans over 10,000 sq ft of office space consisting of a dedicated workforce of over 100+ architectural staff.

Stands a Cut Above the Rest

Beside designing as per guidelines such as NABH, NABL, IHFG; RSMS follows a 'Salutogenic Model' that helps design efficient curative spaces. The firm's design

principles focus on patient care, reducing the patient's stress and recovery time. The flexibility in planning and designing allows RSMS to create healthcare facilities that can expand over time, accommodating any necessity for development in the future.

Ar. Manu Malhotra design hospitals that are right for the given organizations, providing a 'Made to Fit' experience.

Leveraging Technology

RSMS Architects has a state-of-the-art design studio equipped with the latest technologies that encourage architects to innovate and design. Whether it's architecture design, MEPF coordination, or 3D visualization, the firm works on the latest and the best available software like AutoCAD, BIM, SketchUp, Lumion, and more. Also, before building the structure, RSMS runs multiple simulations using various software like Sefaira, Energy Plus, Design Build, and more with varying building forms to the proposed site to see the building's response to its environment. Its conference rooms are equipped with the latest A/V technologies enabling it to connect with its outstation clients. "These days, we have also been working on futuristic trends like designing hospitals to facilitate robotic surgeries, design facilitating the automation of the work of doctors using AI in radiology and pathology, Incorporation of IoT in healthcare, and more", concludes Ar. Manu.
